

Diaphragm seal with threaded connection

Threaded design

Model 990.40, for low pressure ranges

WIKA data sheet DS 99.06

for further approvals
see page 5

Applications

- For aggressive, hot, corrosive, environmentally hazardous or toxic media
- For mounting to measuring instruments for low pressure ranges or to differential pressure measuring instruments
- Filter monitoring
- Level measurement

Special features

- Process connection with thread
- Version with internal diaphragm, large working volume, diaphragm seal parts screwed together
- Large selection of process connections and materials
- Flushing connections optionally available

Description

Diaphragm seals are used for the protection of pressure measuring instruments in applications with difficult media. In diaphragm seal systems, the diaphragm of the diaphragm seal effects the separation of the instrument and the medium. The pressure is transmitted to the measuring instrument via the system fill fluid which is inside the diaphragm seal system.

For the implementation of demanding customer applications, there are a wide variety of designs, materials and system fill fluids available.

For further technical information on diaphragm seals and diaphragm seal systems see IN 00.06 "Application, operating principle, designs".

**Diaphragm seal with threaded connection,
model 990.40**

The model 990.40 diaphragm seal with threaded connection in threaded design is suitable for versatile application areas. A replacement of the lower body is possible without modifications on the diaphragm seal system. With this diaphragm seal, low pressure ranges can be covered. The large diameter of the diaphragm effects a lower deviation at the measuring instrument when the temperature changes.

Mounting of the diaphragm seal to the measuring instrument may be made via a direct connection, for high temperatures via a cooling element or via a flexible capillary.

For the material selection WIKA offers a variety of solutions, in which the upper body of the diaphragm seal and the wetted parts can be made of identical or different materials. The wetted parts can, as an alternative, be coated.

Specifications

Model 990.40	Standard	Option
Pressure range	0 ... 100 bar [0 ... 1,450 psi] or all other equivalent vacuum or combined pressure and vacuum ranges	
Level of cleanliness of wetted parts	Oil and grease free per ASTM G93-03 level F WIKA standard (< 1,000 mg/m ²)	Oil and grease free per ASTM G93-03 level D and ISO 15001 (< 220 mg/m ²)
Origin of wetted parts	International	EU, CH, USA
Connection to the measuring instrument	Axial adapter	Axial adapter with G ½, G ¼, ½ NPT or ¼ NPT (female)
Type of mounting	Direct mounting	<ul style="list-style-type: none"> ■ Capillary ■ Cooling element
Sealing	PTFE max. 260 °C [500 °F]	<ul style="list-style-type: none"> ■ FPM, max. 200 °C [392 °F] ■ Statotherm®, max. 400 °C [752 °F]
Flushing connection	-	<ul style="list-style-type: none"> ■ Single flushing connection (G ¼, G ⅛, ¼ NPT, ⅛ NPT) ■ Dual flushing connection (G ¼, G ⅛, ¼ NPT, ⅛ NPT) ■ Plug screws
Design per NACE	-	<ul style="list-style-type: none"> ■ MR 0175 ■ MR 0103
Vacuum service (see IN 00.25)	Basic service	<ul style="list-style-type: none"> ■ Premium service ■ Advanced service
Instrument mounting bracket (only for capillary option)	-	<ul style="list-style-type: none"> ■ Form H per DIN 16281, 100 mm, aluminium, black ■ Form H per DIN 16281, 100 mm, stainless steel ■ Bracket for pipe mounting, for pipe outer Ø 20 ... 80 mm, steel (see data sheet AC 09.07)

Example: Model 990.40 with mounted process transmitter

Process connection

Standard	Male thread		Female thread	
	Standard	Option	Standard	Option
Following DIN ISO 228-1	G ½ A	G ¼ A G ⅜ A G ¾ A G 1 A G 1 ½ A	G ½	G ¼ G ⅜ G ¾ G 1
Following ASME B 1.20.1	½ NPT	¼ NPT ⅜ NPT ¾ NPT 1 NPT 1 ½ NPT	½ NPT	¼ NPT ⅜ NPT ¾ NPT 1 NPT
Following DIN 13-1	M20 x 1.5	-	M20 x 1.5	-

1) The maximum permissible process temperature of the diaphragm seal system is limited by the joining method, by the system fill fluid and by the measuring instrument.

2) For G ½ and M 20 x 1.5 (male), max. 0 ... 100 bar

Further material combinations for special process temperatures on request

Approvals

Logo	Description	Country
	EAC (option) Pressure equipment directive	Eurasian Economic Community
-	CRN Safety (e.g. electr. safety, overpressure, ...)	Canada
-	MTSCHS (option) Permission for commissioning	Kazakhstan

Certificates (option)

- 2.2 test report per EN 10204 (e.g. state-of-the-art manufacturing, material proof, indication accuracy for diaphragm seal systems)
- 3.1 inspection certificate per EN 10204 (e.g. material proof for wetted metallic parts, indication accuracy for diaphragm seal systems)

Approvals and certificates, see website
